

Managers Tasks made easy and quick

Segmentation

In almost all the industries where in manager plays a vital role by performing day-to-day activities from monitoring performance of the team to conducting appraisals, manipulating expenditures and resources to ensure smooth and efficient delivery of deliverables and achieving client satisfaction.

Targeting

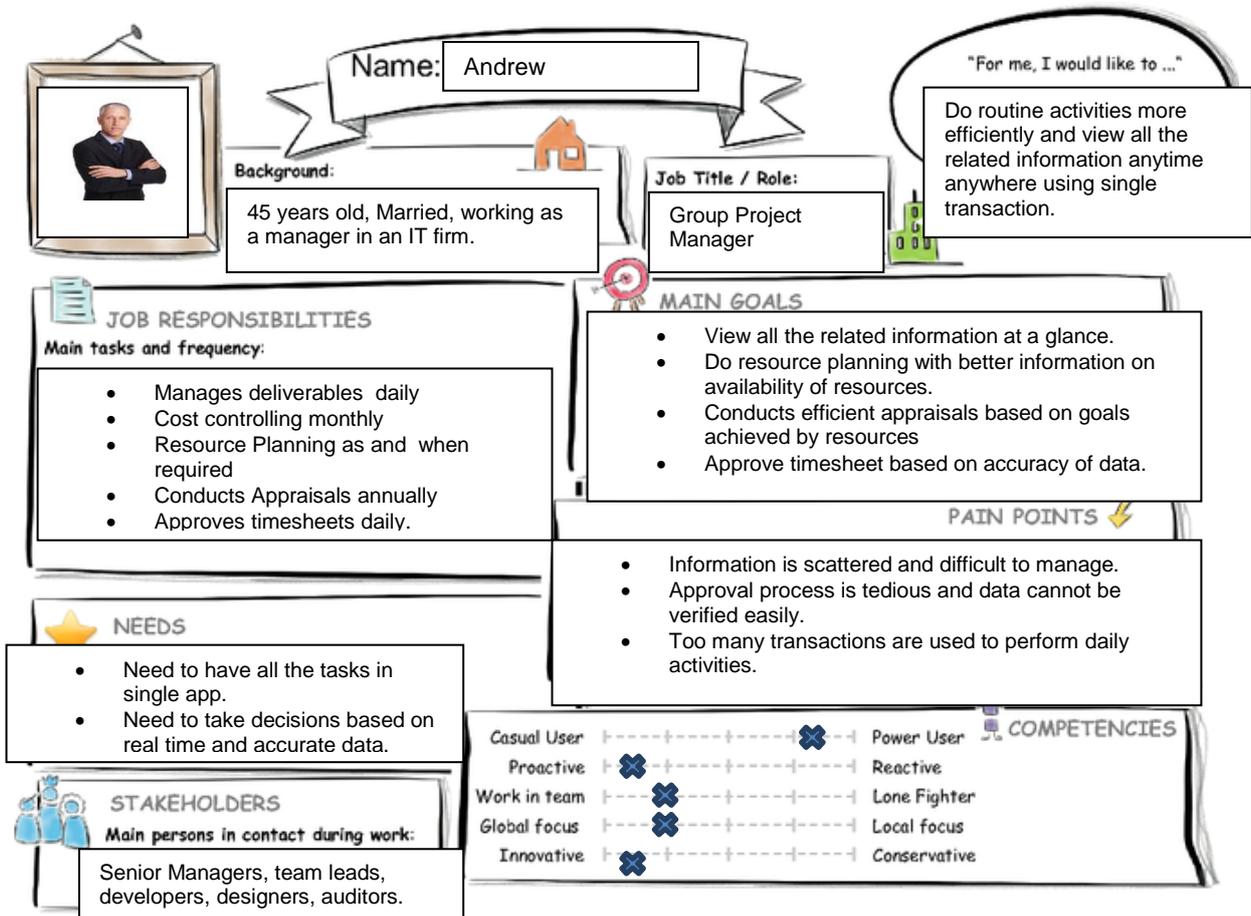

The managers, group managers, delivery managers from various industries can utilize this app to monitor different projects and accomplish certain tasks easily. This app will not only expedite the routine activities but make them more efficient and hassle free.

Positioning

The existing process flow in various industries requires managers to visit plethora of tools, transactions and web pages to perform their daily activities. Through this Fiori app all the information and activities are brought under one umbrella which reduces the time to perform various tasks and helps to keep track of different projects anywhere and at anytime. Major functionalities which can be performed using this app are:

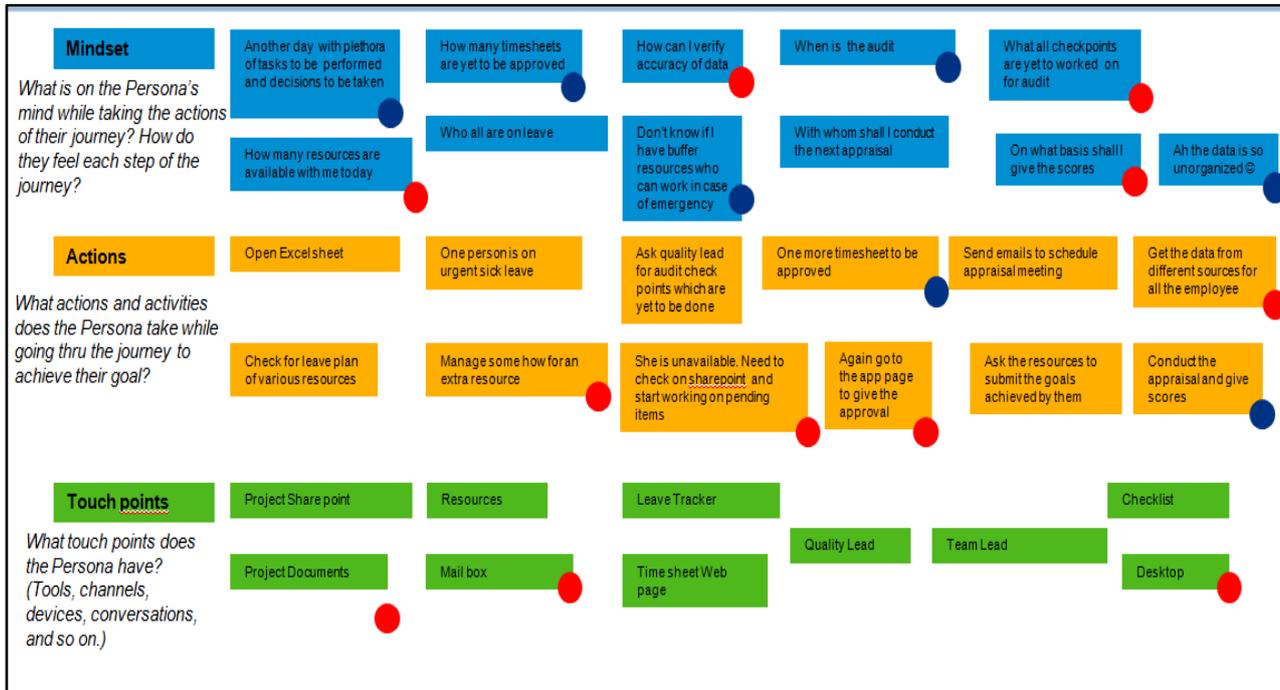

1. Maintaining information related to various projects like revenue from the projects, resources currently working on the projects, upcoming deliverables and things that need to be optimized.
2. Conducting appraisals, keeping track of appraisals and scores of resources.
3. Resource planning, keeping track of various resources available at a time and allocating and de-allocating resources.
4. Timesheet approval and monitoring working hours of resources.
5. Monitoring audit checklist and documentation for the projects.

Persona

Current User Experience Journey
