

SAP Fiori UX Design and Build Challenge

By Tarun Trehan

Outline:

This app is developed to solve issue of Production Manager of Car Assembly Line , Mr. Bob Mathew. He was having a problem that issue logging and resolution take a lot of time which results in significant loss. So to reduce his time, I have developed an App that will help him assign the issue to the local available engineer from his phone itself.

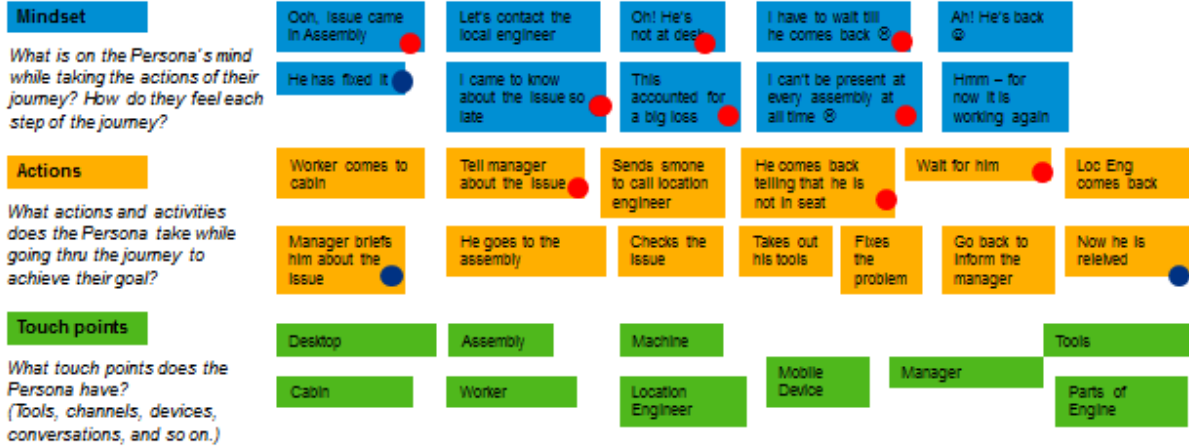

Persona : Mr. Bob Mathew

User Experience Journey

Current User Experience Journey

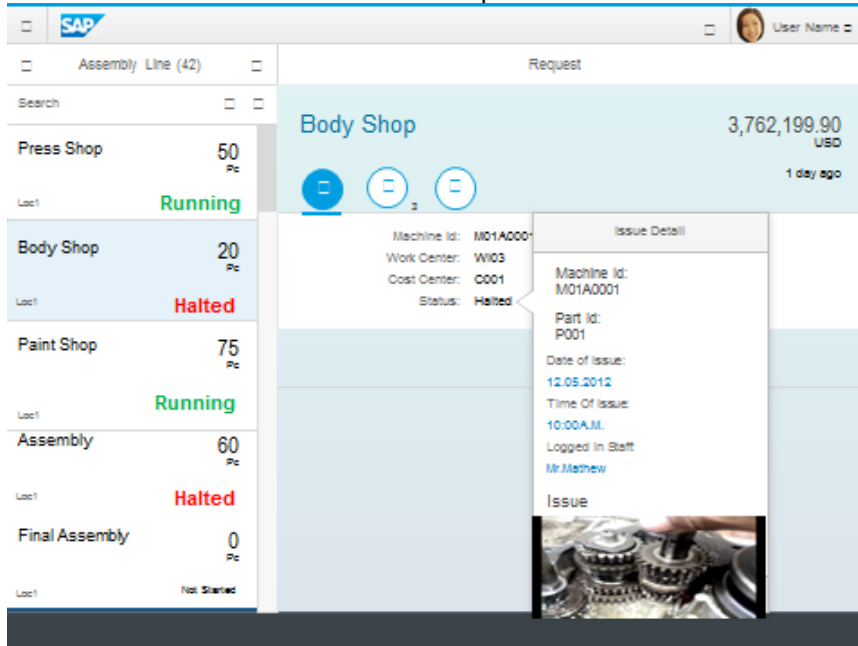

Duration of the Journey: 20 min

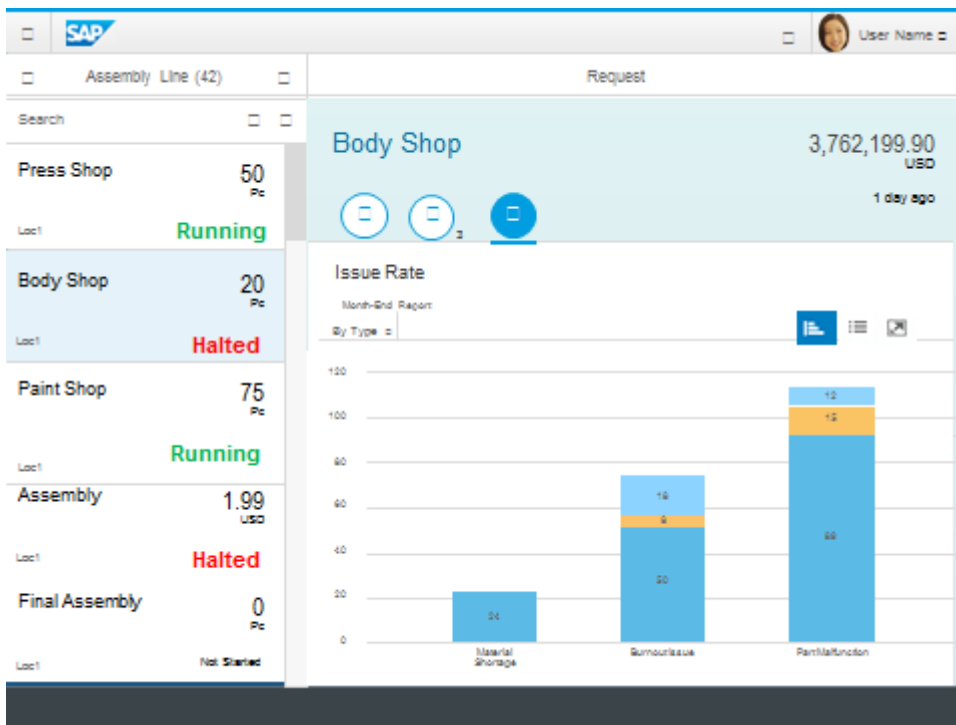

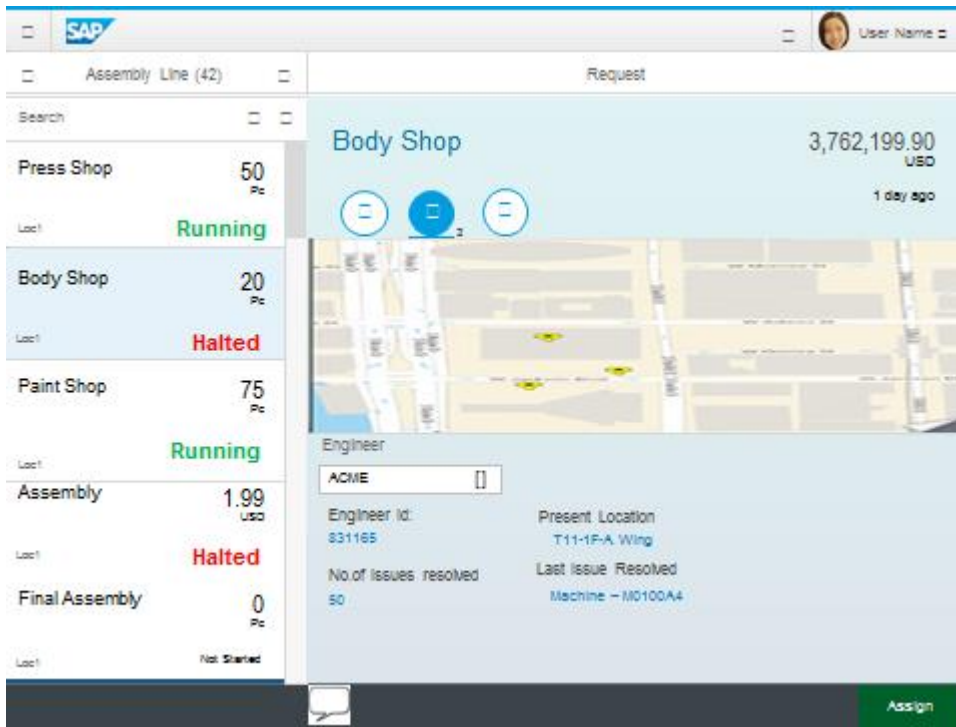

Mock Up

We will be using Master-Detail Template for this app. Master will have the list of machines in assembly line with status of each. These status will tell Mr. Bob when is the time for emergency. In the detail section we have Icon Tab Bar which gives option to show three functionality viz: Issue Details, Assigning Issue and Reporting. We have also used Pop Over to give detail of the Issue.

Below are the screenshots of the Mockup:

This way the App was developed.

Story and Screenshots of the App are in the Video.
