MOCK UP (PROTOTYPE)

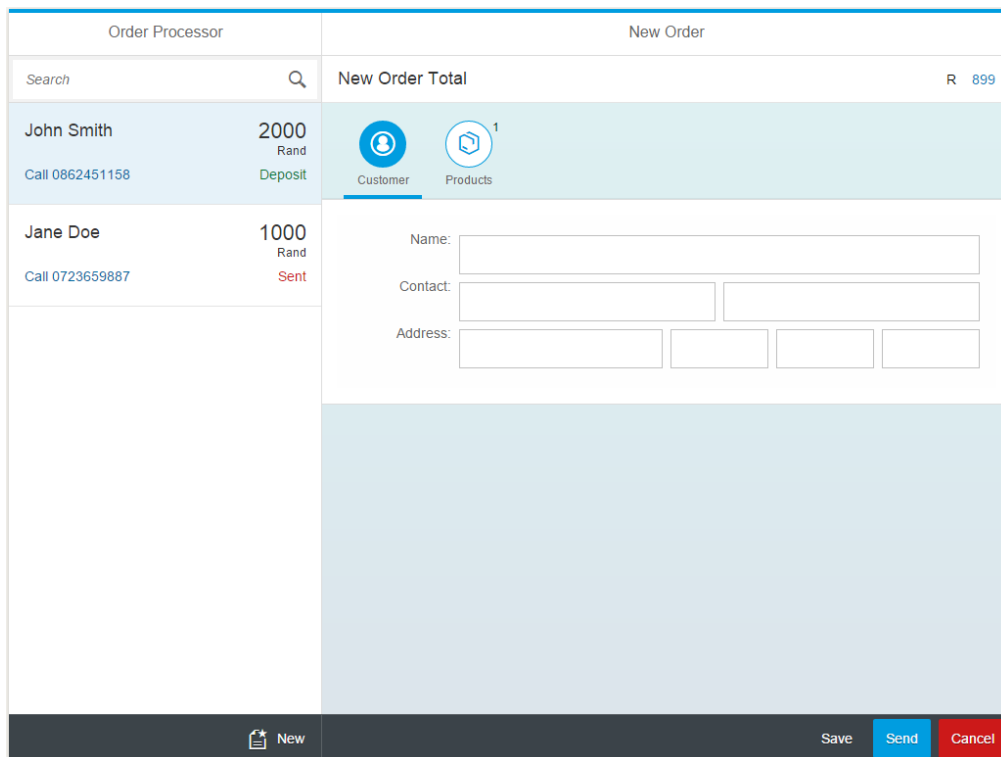

The application should have a clean and responsive design so it can be effectively used on a mobile phone, tablet or desktop. This application allows Johan to quickly create a new order on any device he has available and send the invoice to the customer. The customer can pay the deposit, before running out of money to spend at the tradeshow.

Order Processor	Order
<input type="text" value="Search"/>	
<p>John Smith 2000 Rand 0862451158 Deposit</p>	<p>John Smith 2000 Deposit Deposit</p>
<p>Jane Doe 1000 Rand 0723659887 Sent</p>	<p><i>(Info and Edit icons)</i></p> <p>CustomerName: John Smith Deposit: 0 Discount: 0</p>
<i>(Clipboard icon)</i>	<i>(Send button)</i>

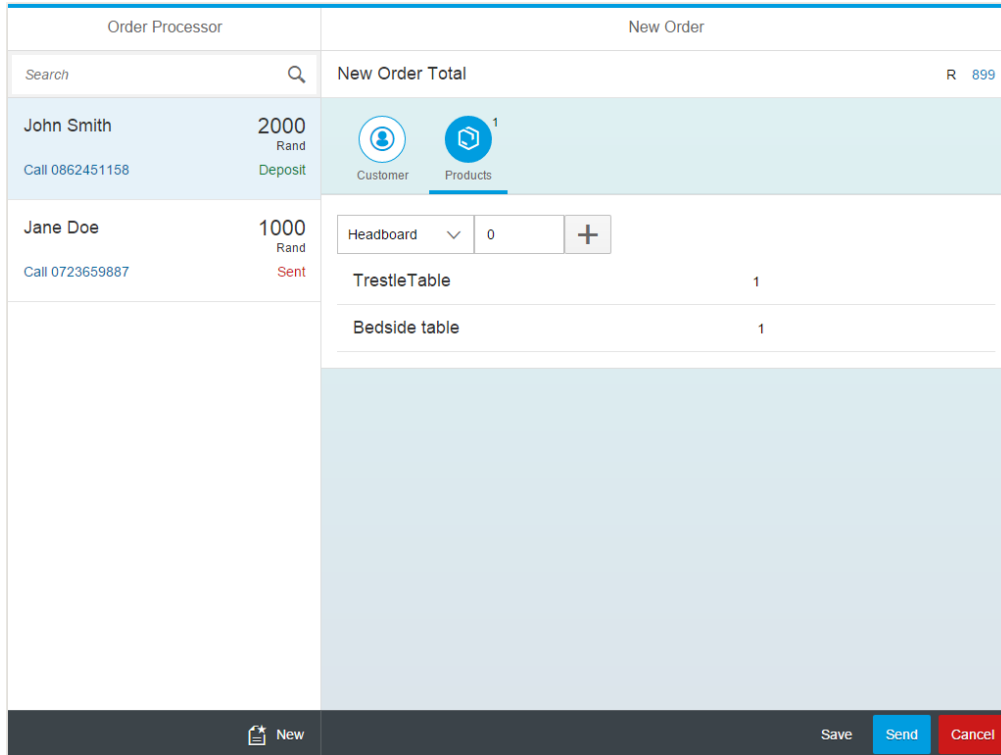

1 - All the orders can be seen and a single order can be viewed by clicking on the item in the list.

2 - The products for each order can be viewed and the invoice can be sent immediately.

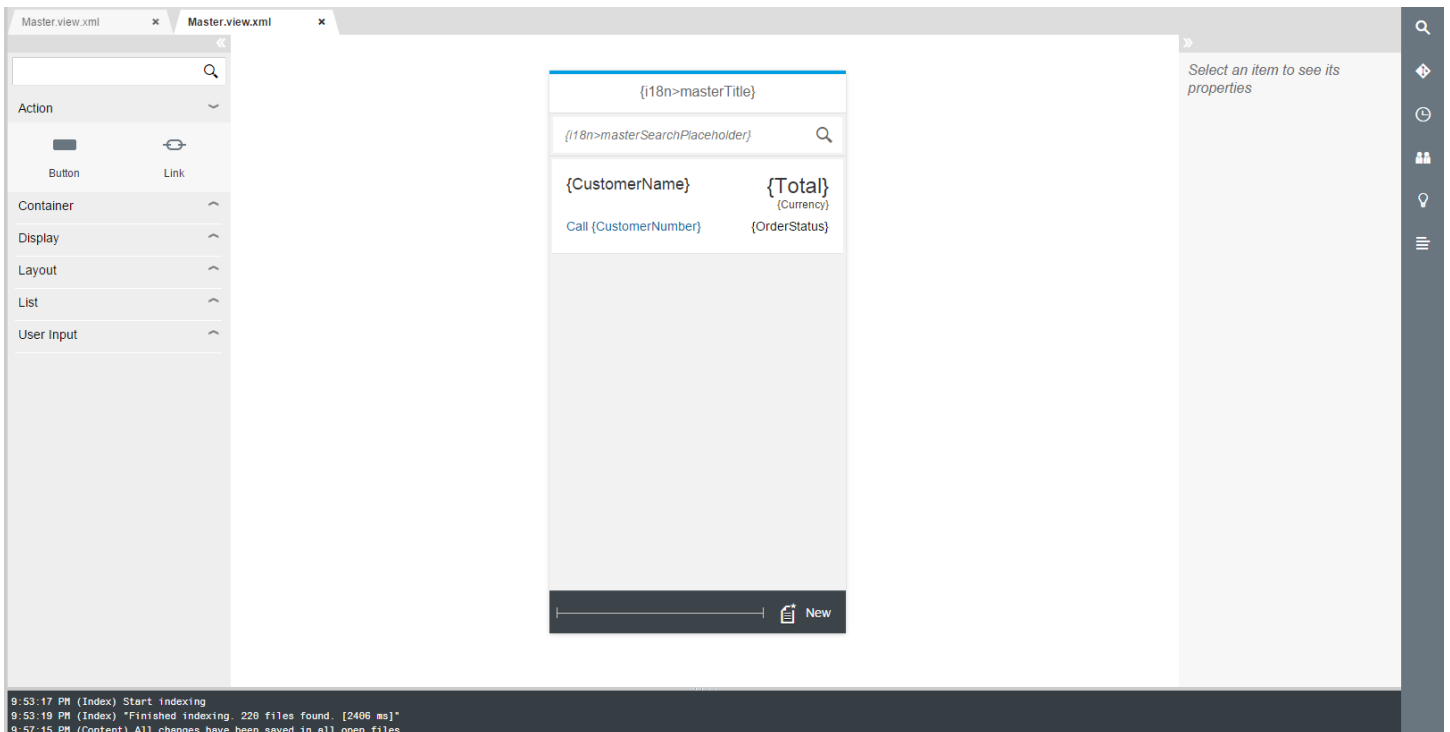

3 - A new order can easily be created and the customer data captured.

4 - Products can be added to the new order and the invoice can be sent immediately or the saved and sent later.

SAP WEB IDE APP

To develop the application, the SAP WebIDE was used. To optimize the development process, data binding was used as can be seen from the figure below.

The screenshot shows a desktop application interface. On the left is a list of order processors, and on the right is a detailed view of an order for Beverly Ellis.

6 - Mobile view

The application was designed to be responsive. As can be seen from the figure on the left (phone) and above (tablet). The forms displaying the data are responsive as well as the table to only show the most important information. Thus Johan can use the application efficiently and effectively on a mobile phone, tablet or desktop.

At any point, Johan can send an update of the invoice or order status to the buyer. Improving communication between Johan and his customers and saving him time by automating the process.
